REMARKS

Applicant respectfully requests reconsideration and allowance of the subject application.

Claims 1-48 were originally submitted.

No claims are canceled.

No claims are added.

Claims 1, 13, 24, 28, 32, 37, 42 and 47 are currently amended.

Claims 1-48 remain in this application.

Drawings

The drawings are objected to because Fig. 3 uses the number "320" to designate two steps. The Action states that "The 'Establish/Create Comm. Channel with Server Computer' step should be labeled --325--, as shown in the specification on page 12, line 18."

A corrected drawing sheet with Fig. 3 is provided with this response in compliance with 37 CFR 1.121(d). Accordingly, Applicant respectfully requests that the drawing objection be withdrawn.

Examiner Interview

A telephone interview took place on July 12, 2006 between Examiner Manual Barbee and Emmanuel Rivera. The primary reference of U.S. Published Application 2001/0012986 to Conan et al (Conan) was discussed. Conan is used by itself or in combination in rejecting the claims 1-48 in the Action. It was agreed that Conan teaches that the testing or the test script is executed or performed at testers or clients, not at a server computer. The claims have been amended to specifically recite that the testing is performed or executed by the server computer. Examiner Barbee agreed that such amendments should overcome Conan; however, Examiner Barbee indicated additional searching would be performed. Along with this response, a request for continued examination (RCE) will be filed.

CONCLUSION

All pending claims 1-48 are in condition for allowance. Applicant respectfully requests reconsideration and prompt issuance of the subject application. If any issues remain that prevent issuance of this application, the Examiner is urged to contact the undersigned attorney before issuing a subsequent Action.

Respectfully Submitted,

Dated: 7-31-06
